Antimicrobial Copper is the most effective touch surface material in the fight against pathogenic microbes. Killing greater than 99.9% of bacteria within 2 hours of exposure, no other material comes close.
The Antimicrobial Copper brand and Cu+ mark are used by leading manufacturers of hospital equipment, furniture and fittings to indicate that their products are made from Antimicrobial Copper.
The use of the Antimicrobial Copper brand and Cu+ mark by an organisation indicates that a Copper Centre, on behalf of International Copper Association, Ltd, has granted permission to do so based upon adherence to strict usage rules. These rules guide that organisation's understanding of the underlying technology and the way they promote, advise and deploy it in line with existing research, regulatory and legislative requirements.
